

CompAir

The Ultimate Aircraft Evaluation Tool

In the past, you may have spent hours researching multiple data sources and searching magazine archives to evaluate an aircraft. Whether you are considering a new aircraft or re-evaluating an existing one, there is a better way. Using CompAir's powerful software and intuitive interface, you can quickly and easily compare over 150 of the most popular business and charter aircraft. The online CompAir database facilitates

Aircraft Profiles

The Aircraft Profiles module provides all the data for an aircraft in one place for in-depth analysis. It contains aircraft history, operating costs, and aircraft specifications including performance data. The Aircraft Profile tab also includes articles written about the aircraft by *Business & Commercial Aviation* for convenient research without the tedious task of searching through a stack of magazines. It also includes images of the aircraft exterior, interior and cockpit, plus three-view line drawings and seating layouts.

COMPAIR IS AN ESSENTIAL TOOL FOR:

- Aircraft Brokers
- Charter Sales Staff
- Corporate Flight Departments
- Aircraft Management Companies
- Anyone Purchasing a Business Aircraft

	ATR 72-600	Embraer 175	Boeing 737 MAX 8	Airbus A320neo
MSRP	\$1,200,000	\$1,400,000	\$1,800,000	\$1,500,000
Fuel Consumption	75.20	100.00	137.47	115.82
Maintenance Labor Expenses	\$59.57	\$77.26	\$76.40	\$706.90
Partly Expenses	\$45.62	\$75.52	\$72.79	\$263.55
Max Trip Expenses	\$95.19	\$90.11	\$99.20	\$99.20
Total	\$400.57	\$378.34	\$389.86	\$1,044.55
MSRP Insurance	\$4,423	\$94,375	\$10,736	\$4,620

side-by-side comparisons of multiple aircraft and lists 168 metrics for each aircraft, including real-world aircraft operating costs, performance data, aircraft images, and more. With CompAir, your work is done.

Aircraft Comparison

The heart of CompAir is the Aircraft Comparison module. Simply select the aircraft and parameters of interest and CompAir presents side-by-side data sets for each aircraft. Then you can print custom reports, generate graphical comparisons, create range maps comparing the aircraft, or export data to Excel for further analysis. CompAir comes standard with three comparison templates: Operating Costs, NBAA

Ranges, and an All Fields option. Subscribers can also create their own templates containing only the data fields they select.

Advanced Aircraft Search

If you need to determine which business aircraft meets your particular needs, the Aircraft Search feature is the tool to use. The search engine lets you select parameters such as aircraft manufacturer, price, payload, cruise speed, range, runway length requirements, passenger seating, and operating cost. The result is a list of aircraft that can be easily transferred to other CompAir modules for further analysis.

Distance Module

In the Distance Module, range rings are calculated using great circle distances from the home base that you select.

Subscribers can view one or multiple aircraft with the range rings depicted on a world map. Range options are Maximum Payload, Maximum Fuel, Four Passengers with Maximum Available Fuel, and Ferry range. Range maps can be saved and included in reports.

Report Writer

With the Report Writer, subscribers can create custom reports by selecting content such as aircraft specifications operating costs, performance data, cabin and cross section diagrams, or interior, exterior and cockpit photos. Or, you can opt for the time-saving default template. You can easily personalize the document by adding headers, footers or pre-designed cover sheets.

On-line Data Hosting

CompAir saves your searches, reports, aircraft comparisons, graphs, and range maps in your personal profile folder. These documents are available online for later retrieval allowing you to access them from anywhere in the world.

AMSTAT Market Summary Report

CompAir's AMSTAT report provides real-time pre-owned aircraft market information. Each report includes a pre-owned aircraft Market Summary Report on the selected aircraft model. The Market Summary contains average and high/low selling prices, average days a model has been on the market, and other useful market information.

CompAir is offered on a subscription basis. Contact ARG/US Sales at 800.361.2216 Ext. 10 or at sales@aviationresearch.com for a demonstration of how CompAir can work for you.

Evaluating your options?

With CompAir, your work is done.

Aviation Research Group/ U.S., Inc. (ARG/US) was founded in 1995. Today it has headquarters located in Cincinnati, OH and additional offices in Doylestown, PA. The ARG/US PROS division is located in Denver, CO.

ARG/US offers a comprehensive range of products and services for companies that manufacture, finance, operate, maintain, and market commercial and business aircraft. Consumers of business aviation services and airlines worldwide rely on ARG/US services. ARG/US provides real-time, accurate information and advice together with unique, proprietary information products.

ARG/US services include:

- Safety Officer Support (ASOS)
- Safety Training
- Auditor Training
- Charter Evaluation & Qualification (CHEQ) Service including TripCHEQ
- On-site safety audits for Part 91, Part 135, and Part 121 operators, plus IS-BAO and IATA certifications
- Aircraft operating cost reports available individually or as a subscription to the entire database, CompAir
- Market research
- Travel Assessments
- TraqPak data services
- Consulting services
