- Web-based Hazard Reporting Database and Flight Risk Assessment Tool
- Internal Evaluation Program
- Extensive Training and Education
- SMS Validation and Auditing

** PRISM is a wholly owned subsidiary of ARGUS International, Inc.*

Whether you operate privately, commercially, as an air carrier, fixed wing, rotary wing, or around the world, PRISM's unique SMS subscription program is all you need to run an efficient Safety Management System (SMS). Recognizing the challenges operators face when implementing and maintaining an SMS, PRISM provides a constructed pathway to ease the burden of compliance and improve the effectiveness of your flight operation.

PRISM: Complete and Simple SMS Support

PRISM's unique internet-enabled solutions coupled with our in-house Safety Experts address the challenges of setting up a functional and effective SMS. All PRISM products are aligned with the ICAO "Four Pillars of Safety Management" concept and completely compliant with the International Standard for Business Aircraft Operations (IS-BAO). PRISM is registered with the International Business Aviation Council (IBAC) as an Implementation Support Provider for IS-BAO.

PRISM SMS is designed around a three-pronged approach to safety management.

1. PRISM delivers a steady, on-going stream of materials to sustain your flight operation's safety management efforts.

2. PRISM provides a continuously improving set of information management tools that evolve with industry practices to keep you on the cutting edge.
3. Personal support is the cornerstone of our program. The relationship with our customers is embraced as an ongoing partnership, and is the most important component of our program.

PRISM's Online Solution: ARMOR

PRISM understands the 24/7/365 nature of the aviation industry and has developed ARMOR (Aviation Risk Management Online Resource), a web-based tool that provides operators with a system that all employees can gain required access to at any time, while allowing the safety officer the ability to manage all elements of their SMS

with a laptop and internet connection from anywhere around the world. ARMOR features a useful Hazard Reporting Database, Flight Risk Assessment Tool and Internal Evaluation Program.

Customize PRISM SMS to Fit your Needs

PRISM SMS is the only comprehensive solution that can be customized to fit the specific needs of your organization. By offering four unique packages or the option to create your own, PRISM provides exactly what you need for developing, implementing or maintaining your SMS program. These packages are outlined in the chart to the left.
